

TO: All State Agencies/Institutions Directors

FROM: Robin R. Reidman, Risk Manager, State Fleet Services

DATE: May 10, 2005

SUBJECT: Semi-annual Motor Vehicle Collision Report

State Fleet Services experienced a total of 149 reported motor vehicle collisions from July 1, 2004 through December 31, 2004. This represents an increase of 2 percent from the same period last year.

The most frequent type of crash continues to be backing. 31 percent of State Fleet collisions during this period were caused by improper backing. Unrecovered collision repair cost is a factor in establishing rental rates for State Fleet vehicles. Backing collisions are almost always preventable.

Safe driving is everyone's concern. No one is immune from a crash. The attached charts and graphs represent the data visually. Please share it with your entire staff.
